

FINANCIAL STATEMENTS

December 31, 2017 and 2016

INDEPENDENT AUDITORS' REPORT

To the Shareholders of 49 North Resources Inc.

We have audited the accompanying financial statements of 49 North Resources Inc., which comprise the statements of financial position as at December 31, 2017 and 2016, and the statements of income (loss) and comprehensive income (loss), changes in equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these financial statements present fairly, in all material respects, the financial position of 49 North Resources Inc. as at December 31, 2017 and 2016 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

1. Description of business

Description of business

49 North Resources Inc. (the "Corporation") is a resource investment, financial, and managerial advisory company which, as its principal business, invests in a diversified portfolio of common shares and other securities of resource issuers including, without limitation, resource issuers engaged in mineral or oil and gas exploration and development, with a view to achieving capital appreciation of the portfolio.

The Corporation is domiciled in the Province of Saskatchewan, Canada and its office address is at Suite 602 – 224 4th Avenue South, Saskatoon, Saskatchewan, Canada, S7K 5M5.

2. Significant accounting policies

The significant accounting policies used in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented.

Statement of compliance

These financial statements have been prepared on a going concern basis and in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The financial statements of the Corporation for the year ended December 31, 2017 were authorized for issuance by the Corporation's board of directors on April 20, 2018.

Adoption of IFRS for investment entities and basis of preparation

IFRS 10 "Consolidated Financial Statements" ("IFRS 10") provides an exception to the consolidation requirements for entities that meet the definition of an investment entity and requires such an entity to measure its investments in particular subsidiaries at fair value through profit or loss instead of consolidating those subsidiaries in its consolidated financial statements.

In accordance with IFRS 10, an investment entity is an entity that: (i) obtains funds from one or more investors for the purpose of providing them with investment management services, (ii) commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both, and (iii) measures and evaluates the performance of substantially all of its investments on a fair value basis. In addition, IFRS 10 clarifies that an investment entity may earn fee income from the provision of investment-related services to external parties.

The Corporation pursues business investment opportunities with the objective of growing shareholder value through capital appreciation in these investments and related income. The Corporation uses fair value as the key measure to monitor and evaluate the majority of its equity investments. The Corporation also earns, through wholly and partially-owned entities, advisory fees in connection with its investment activities. The provision of these advisory services does not constitute a significant business activity of the Corporation and the Corporation has assessed and concluded that the advisory fees do not represent a substantial source of revenues. As a result, the Corporation has determined that it qualifies as an investment entity under IFRS, and commenced reporting its financial results in accordance with IFRS applicable to investment entities, on a prospective basis, effective January 1, 2016.

Adopting the investment entity accounting rules in IFRS 10 had a significant impact on the Corporation's financial statements, and the Corporation recognized a gain on deconsolidation of formerly consolidated investees in the amount of \$7,119 during the year ended December 31, 2016. The Corporation no longer consolidates any of its investees.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Adoption of IFRS for investment entities and basis of preparation - continued

These financial statements have been prepared on a historical cost basis except for certain financial instruments which have been measured at fair value. These financial statements are presented in Canadian dollars, which is the Corporation's functional currency.

In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Basis of consolidation

As of January 1, 2016, the Corporation met the requirements of IFRS 10 and adopted investment entity accounting as described above, therefore the December 31, 2016 amounts are presented on the basis of the Corporation as a standalone entity.

See Note 7 for listing of the Corporation's former subsidiaries.

Foreign currency translation

i) Functional currency

Items previously included in the financial statements of each of the Corporation's former subsidiaries were measured using the currency of the primary economic environment in which the subsidiary operated (the "functional currency"). The functional currency for the Corporation and its former subsidiaries is the Canadian dollar ("Canadian dollar").

ii) Foreign currency transactions

Foreign currency transactions are translated into the Corporation's functional currency and its former subsidiaries at exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statements of income (loss) and comprehensive income (loss).

iii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to Canadian dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated to Canadian dollars at the dates of the transactions. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange gains or losses of foreign operations are recognized in profit or loss.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Financial assets are classified, at initial recognition, as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets, or derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Financial instruments - continued

Financial assets carried at amortized cost are assessed at each reporting date for any potential impairment. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the carrying amount and the present value of estimated future cash flows discounted using the original effective interest rate. The carrying amount of the asset is then reduced by the amount of the impairment and is recognized in the statements of income (loss) and comprehensive income (loss).

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the reversal of the previously recognized impairment loss is recognized in the statements of income (loss) and comprehensive income (loss).

Purchases or sales of financial assets that require delivery of assets in a timeframe established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, which is the date that the Corporation commits to purchase or sell the asset.

The Corporation's financial assets include cash, equity investments, accounts receivable, loans and advances receivable, convertible debenture receivable and embedded derivative asset.

Fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments, as defined by International Accounting Standards ("IAS") 39.

The Corporation's equity instruments (which are designated as held for trading) are carried at fair value with net changes in fair value shown in the statements of income (loss) and comprehensive income (loss) as unrealized gains or losses on portfolio instruments. The fair value of those instruments is determined as follows:

Publicly traded companies

The fair value of any security which is listed or traded upon a stock exchange is estimated by taking the latest bid price. The fair value of investment funds and limited partnerships are recorded based on their published net asset value per unit or last bid price, as appropriate.

The market values can be impacted by trading volumes, restrictions and market price fluctuations, and the quoted market price may not be indicative of what the corporation could realize on the immediate sale as it may take an extended period of time to liquidate positions without causing a significant negative impact on the market price.

Privately held companies

The fair value of any shares which are not listed or traded in a stock exchange are originally recorded at cost, unless the shares are flow-through shares, in which case they are originally recorded either on an assessment of the most recent price at which the investee Corporation issued common equity without flow-through characteristics or at management's estimated fair value. After the initial transaction, adjustments are made to reflect any changes in fair value as a result of an independent third party transaction. Downward adjustments to the carrying values are also made when there is evidence of a decline in value, as indicated by an assessment of the financial condition of the investment based on operational results, forecasts and other developments.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Financial instruments - continued

Options and Warrants

For options and warrants which are not traded on a recognized securities exchange, no market value is readily available. When there are sufficient and reliable observable market inputs, the options and warrants are valued using the Black-Scholes option pricing model, otherwise they are recorded at their intrinsic value.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses.

The Corporation's loans and receivables are comprised of cash, loans and advances receivable, accounts receivable and convertible debenture receivable.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale and are not classified in any of the previous categories of financial assets. Available-for-sale financial assets are recognized initially at fair value plus any directly attributable transaction costs.

Subsequent to initial recognition, these assets are measured at fair value and changes therein, other than impairment losses, are recognized in other comprehensive income (loss) and presented within equity. When an investment is derecognized through sale or has an impairment that is other than temporary, the cumulative gain or loss in other comprehensive income (loss) is transferred to profit or loss.

The Corporation does not have any financial assets that are classified as available-for-sale.

Held-to-maturity financial assets

If the Corporation has the positive intent and ability to hold debt securities to maturity, then such financial assets are classified as held-to-maturity. Held-to-maturity financial assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, held-to-maturity financial assets are measured at amortized cost using the effective interest method, less any impairment losses.

The Corporation does not have any financial assets that are classified as held-to-maturity.

Financial liabilities

Other financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as fair value through profit or loss or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Corporation's accounts payable and accrued liabilities and debt components of convertible debt, subordinate debt and preferred shares are classified as other financial liabilities.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Financial instruments - continued

Financial liabilities classified as fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as fair value through profit or loss. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in profit or loss unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as fair value through profit or loss are recognized in profit or loss.

Compound financial instruments

A compound financial instrument is a non-derivative financial instrument that contains both a liability and an equity component. The Corporation accounted for its convertible debentures (Notes 8 and 9) as compound financial instruments. The conversion feature is treated as an equity component and accounted for in compliance with IAS 32 and IAS 39 relating to initial recognition of compound instruments.

IAS 39 deals with the measurement of financial assets and liabilities. Equity instruments are instruments that evidence a residual interest in the assets of an entity after deducting all of its liabilities. Therefore, when the initial carrying amount of a compound financial instrument is allocated to its equity and liability components, the equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. The value of any derivative features embedded in the compound financial instrument other than the equity component is included in the liability component.

The sum of the carrying amounts assigned to the liability and equity components on initial recognition is always equal to the fair value that would be ascribed to the instrument as a whole. No gain or loss arises from initially recognizing the components of the instrument separately.

The convertible debentures met the criteria to be accounted for as a compound instrument in accordance with IAS 32. As such, the Corporation has first determined the carrying amount of the liability component by measuring the fair value of a similar liability that does not have an associated equity component. The carrying amount of the equity instrument represented by the conversion feature has then been determined by deducting the fair value of the financial liability from the fair value of the compound financial instrument as a whole.

Debt modifications and extinguishments

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

If a debt modification is deemed to have been accomplished with debt instruments that are substantially different, the modification is accounted for as a debt extinguishment, whereby the Company must recognize currently in income the difference between the reacquisition price and the net carrying amount of the extinguished debt. Any fees paid by the debtor to the creditor are associated with the extinguishment of the old debt instrument and are included in determining the debt extinguishment gain or loss to be recognized.

If modification of terms is accounted for as an extinguishment of the original debt any costs or fees incurred is recognized as part of the gain or loss on the extinguishment. However, if modification is not accounted for as an extinguishment, any costs or fees incurred are an adjustment to the carrying amount of the liability and will be amortized over the remaining term of the modified liability.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Financial instruments - continued

Cash and cash equivalents

Cash and cash equivalents include highly liquid investments with original maturities of three months or less, and which are subject to an insignificant risk of change in value. Cash and cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Convertible debentures receivable

When the Corporation holds debentures that are convertible into the issuer's equity shares at the Corporation's option, the equity conversion feature represents an embedded option written by the issuer on its equity shares. The embedded derivative is not closely related to the host contract (the debentures) from the Corporation's perspective. Such conversion feature is classified as fair value through profit or loss, with the debentures being classified as loans and receivable.

The embedded derivative's fair value (the conversion feature) is calculated first, and the carrying value of the debenture is assigned the residual amount after deducting from the consideration paid to acquire the hybrid instrument, the amount separately determined for the embedded derivative.

Exploration and evaluation assets

Pre-license costs

Pre-license costs are costs incurred before the legal rights to explore a specific area have been obtained. These costs are expensed in the period in which they are incurred as exploration and evaluation expense.

Once the legal right to explore has been acquired, costs directly associated with the exploration project are capitalized as either tangible or intangible exploration and evaluation assets according to the nature of the asset acquired. Such E&E costs may include undeveloped land acquisition, geological, geophysical and seismic, exploratory drilling and completion, testing, decommissioning and directly attributable internal costs. E&E costs are not depleted and are carried forward until technical feasibility and commercial viability of extracting a mineral resource is considered to be determined. The technical feasibility and commercial viability of a mineral resource is considered to be established when proved and/or probable reserves are determined to exist. All such carried costs are subject to technical, commercial and management review at least once a year to confirm the continued intent to develop or otherwise extract value from the exploratory activity. When this is no longer the case, impairment costs are charged to profit or loss. Upon determination of proved and/or probable reserves, E&E assets attributed to those reserves are first tested for impairment and then reclassified to development and production assets within property, plant and equipment, net of any impairment. Expired land costs are also expensed to exploration and evaluation expense as they occur. Sales from drilling results are credited against the capitalized E&E costs.

Proceeds received from a partial sale or option of any interest in an exploration and evaluation asset are credited against the carrying value of the exploration and evaluation asset. When the proceeds exceed the carrying costs the excess is recorded in profit or loss in the period the excess is received.

E&E assets are assessed for impairment if facts and circumstances suggest that the carrying amount exceeds the recoverable amount, and upon transfer to property, plant and equipment whereby they are allocated to cash-generating units based on geographical proximity and other factors.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Exploration and evaluation ("E&E") costs - continued

Farm-in and farm out arrangements

The Corporation, as farmee, recognizes its expenditures under farm-in arrangements in respect of its own interest and that retained by the farmor, as and when the costs are incurred. The farmee accounts for its expenditures under a farm-in arrangement in the same way as directly incurred E&E expenditures.

The Corporation, as farmor, accounts for the farm-out arrangement as follows; the farmor does not record any expenditure made by the farmee on its behalf, does not recognize any gain or loss on the farm-out arrangement, but rather re-designates any costs previously capitalized in relation to the whole interest as relating to the partial interest retained, any cash consideration received is credited against costs previously capitalized in relation to the whole interest with any excess accounted for by the farmor as a gain on disposal.

Property, plant and equipment ("PP&E")

Property, plant and equipment include the costs of development and production that are not E&E assets, and costs for corporate (office) assets. PP&E is recorded at cost less accumulated depletion and amortization and accumulated impairment losses, net of recovered impairment losses.

The Corporation does not hold any assets requiring a substantial period of time to get ready for intended use. Accordingly, to date, no borrowing costs have been capitalized.

Oil and gas development and production assets

Development and production assets are capitalized on an area-by-area basis and include all costs associated with the development and production of oil and natural gas reserves. These costs may include proved property acquisitions, development drilling (including unsuccessful or delineation wells), completion, gathering and infrastructure, decommissioning costs, amounts transferred from E&E assets and directly attributable internal costs.

Expenditures to renew or improve the productive capacity or extend the life of an asset are capitalized. Maintenance and repairs are expensed as incurred.

Any gains or losses from the divestiture of development and production assets are recognized in profit or loss. Accumulated costs are depleted using the unit-of-production method based on estimated proved plus probable reserves. Costs subject to depletion include estimated future costs to be incurred in developing proved plus probable reserves and exclude residual amounts. Depletion is calculated based on individual components (i.e. fields or combinations thereof and other major components with different useful lives).

Other assets

Other capital assets are recorded at cost and are amortized using the declining balance method. On acquisitions during the year, amortization is calculated at one-half the annual rate. Annual amortization rates are as follows:

Computers	30% and 35%
Computer software	100%
Furniture and equipment	30%
Leasehold improvements	20%

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Impairment of non-current assets

The carrying amounts of the Corporation's non-current assets are reviewed at each reporting date for indicators of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the amount of the impairment, if any. The recoverable amount of an asset is evaluated at the Cash Generating Unit ("CGU") level, which is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

The recoverable amount of a CGU is the greater of its fair value less costs to sell and its value in use. Fair value less cost to sell is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognized in earnings for the period to the extent that the carrying amount of the asset (or CGU) exceeds the recoverable amount.

Impairment losses recognized in prior periods are assessed at each reporting date for any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimate used to determine the recoverable amount. An impairment loss is reversed only to the extent that the carrying amount of the asset (or CGU) does not exceed the carrying amount that would have been determined, net of depletion and amortization, had no impairment loss been recognized for the asset (or CGU).

A reversal of an impairment loss is recognized immediately in profit or loss.

E&E assets are assessed for impairment when they are reclassified to property, plant and equipment, or if facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

Provisions

Provisions are recorded when the Corporation has a present obligation as a result of a past event, it is probable that an outflow of resources will be required and a reliable estimate can be made of the amount of the obligation. Provisions are measured based on the discounted expected cash flows.

Decommissioning liabilities are recognized for the future legal or constructive obligation to abandon and reclaim the Corporation's oil and natural gas properties. The amount of the decommissioning liabilities represents the net present value of the estimated future expenditures required to abandon and reclaim the Corporation's net ownership in wells and facilities determined in accordance with local conditions, current technology and current requirements. The liabilities are calculated using currently estimated abandonment and reclamation costs inflated to the estimated decommissioning date and then discounted using a risk-free discount rate. A liability is recorded in the period in which an obligation arises with a corresponding decommissioning cost added to the carrying amount of the related asset. The liability is progressively accreted over time as the effect of discounting unwinds, creating an accretion expense which is recognized as part of finance expense. The related decommissioning cost capitalized in property, plant and equipment is depreciated in a manner consistent with the depletion and depreciation of the underlying asset.

Changes in the estimated liability resulting from revisions to estimated timing of decommissioning, expected amount of cash flows or changes in the discount rate are recognized as a change in the decommissioning liability and the related decommissioning cost. Actual decommissioning expenditures incurred are charged against the accumulated liability to the extent recorded.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Income taxes

Income tax expense is comprised of current and deferred income taxes. Current income tax and deferred income tax are recognized in profit or loss, except to the extent that they relate to items recognized directly in equity or equity investments.

Current income tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred income tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred income tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred income tax assets and liabilities are offset if there is a legally enforceable right to offset current income tax liabilities and assets, and they relate to income taxes levied by the same tax authority for the same taxable entity. A deferred income tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable income will be available against which they can be utilized. Deferred income tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related income tax benefit will be realized.

Share capital

Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares are recognized as a reduction of equity, net of any tax effects.

The Corporation has adopted a relative fair value method with respect to the measurement of shares and warrants issued as private placement units. The relative fair value method allocates value to each component on a pro-rata basis, based on the fair value of the components calculated independently of one another. The Company considers the market value of the common shares issued as fair value, and measures the fair value of the warrant component of the unit using the Black-Scholes option pricing model. The unit value is then allocated, pro-rata, between the two components, with the fair value attributed to the warrants being recorded to warrant reserve.

Preferred shares

The Corporation's preferred shares contain a contractual obligation whereby the Corporation is required to pay a cumulative annual mandatory dividend. Accordingly, part of their value has been classified as a financial liability.

The liability component of the preferred shares is accounted for using the effective interest rate method, using an interest rate of 12%.

Share-based payments

The Corporation has a stock option plan that provides for the granting of options to Officers, Directors, related Corporation employees and consultants to acquire shares of the Corporation. The fair value of the options is measured on grant date and is recognized as an expense with a corresponding increase in contributed surplus as the options vest.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Share capital - continued

Options granted to employees and others providing similar services are measured at grant date at the fair value of the instruments issued. Fair value is determined using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. The amount recognized as an expense is adjusted to reflect the actual number of stock options that are expected to vest. Each tranche in an award with graded vesting is considered a separate grant with a different vesting date and fair value. Each grant is accounted for on that basis.

Options granted to non-employees are measured at the fair value of the goods or services received, unless that fair value cannot be estimated reliably, in which case the fair value of the equity instruments issued is used. The value of the goods or services is recorded at the earlier of the vesting date, or the date the goods or services are received.

On vesting, share-based payments are recorded as an operating expense and as contributed surplus. When options are exercised the consideration received is recorded as share capital. In addition, the related share-based payments originally recorded as contributed surplus are transferred to share capital.

Earnings (loss) per share ("EPS")

Basic EPS amounts are calculated by dividing net income (loss) attributable to common shareholders of the corporation by the weighted average number of common shares outstanding during the period. Diluted EPS amounts are calculated with consideration given to convertible preferred shares, stock options and warrants, and assumes that any proceeds received on exercise of options or warrants would be used to purchase common shares at the average market price during the period. Diluted EPS amounts also include exchangeable shares using the "if-converted" method to determine the dilutive effect of convertible and subordinate debentures, whereby it is assumed the conversion of the exchangeable shares occurs at the beginning of the reporting period (or at the time of issuance, if later) where applicable. The weighted average number of common shares outstanding is then adjusted by the net change.

Segment reporting

An operating segment is a component of the Corporation that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that related to transactions with any of the Corporation's other segments.

To be classified as a segment, discrete financial information must be available and operating results must be regularly reviewed by the Corporation's Chief Executive Officer.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment, exploration and evaluation assets and other intangible assets other than goodwill.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Revenue recognition

Security transactions are recorded on a trade basis. Realized gains and losses on the disposal of investments and unrealized gains and losses in the value of investments are reflected in the statement of income (loss) and comprehensive income (loss). Cost is calculated on an average cost basis. Upon disposal of an investment, previously recognized unrealized gains or losses are reversed, so as to recognize the full realized gain or loss in the period of disposition. All transaction costs are expensed as incurred.

- Other consulting revenue is recognized as the services are provided to the client.
- Interest, rental and dividend income are recognized on an accrual basis.

Revenue is recognized when it is probable that the economic benefits will flow to the Corporation and delivery has occurred, the sale price is fixed or determinable, and collectability is reasonably assured. Revenue is measured based on the sales contract.

Significant accounting judgments, estimates and assumptions

The preparation of these financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period.

Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The information about significant areas of estimation uncertainty considered by management in preparing these financial statements are:

- fair value of investment in securities not quoted in an active market or private Corporation investments;
- the determination of useful lives and residual values of property, plant and equipment;
- the fair value of share-based compensation determined using the Black-Scholes option pricing model using estimates for expected forfeitures, expected lives and stock volatility;
- the provision for deferred income taxes based on estimated tax bases using substantively enacted tax rates expected to apply to taxable income during the years in which the differences are expected to be recovered or settled;
- as described in Note 8, when the terms of convertible debentures are modified, it is often accounted for as a de-recognition of the carrying value of the pre-modified loan and the new recognition of a new loan at the then fair value. In the determination of fair value, the Corporation uses a discounted cash flow technique which includes inputs that are not based on observable market data and inputs that are derived from observable market data. In the case of its convertible debenture modifications, where available, the Corporation seeks comparable interest rates. If unavailable, it uses those considered appropriate for the risk profile of a corporation in the industry; and
- the fair value of the embedded derivative asset determined using the Black-Scholes option pricing model using estimates of expected life and stock volatility.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Significant accounting judgments, estimates and assumptions - continued

In the process of applying the Corporation's significant accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the financial statements:

- determination of the Corporation meeting the criteria required under IFRS 10 in order to be classified as an investment entity;
- determination of deferred income tax assets or liabilities, which involves subjective assumptions regarding future income tax rates and the likelihood of utilizing tax carry-forwards; and
- valuation techniques for fair value determination of investments in private entities.

New accounting pronouncements

Certain new accounting standards and interpretations have been published that are mandatory for period ends beginning on or after January 1, 2017. None of the new standards adopted had a material impact on the Corporation's financial statements.

Future accounting pronouncements

In July 2014, the IASB issued the final publication of the IFRS 9 standard, which will supersede IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets, and the new hedge accounting guidance.

Under IFRS 9, financial assets will be classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. Management has assessed that adoption of IFRS 9 will have a material impact on the accounting treatment of its convertible debenture receivable. Currently, the Corporation has bifurcated the debenture receivable and carries the host debt contract at amortized cost, with the embedded derivative asset being carried at FVTPL. On adoption of IFRS 9, the debenture will be considered in its entirety at FVTPL, without bifurcation of the components.

IFRS 9 also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. The standard is effective for annual periods beginning on or after January 1, 2018.

The Corporation intends to adopt IFRS 9 in its financial statements for the annual period beginning January 1, 2018. With the exception of the adjustment of the accounting for the Corporation's convertible debenture receivable discussed above, the adoption of IFRS 9 is not expected to have a material impact on the Corporation's financial statements.

On May 28, 2014, the IASB issued the final revenue standard, IFRS 15, Revenue from Contracts with Customers, which will replace IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfer of Assets from Customers, and SIC 31 Revenue – Barter Transactions Involving Advertising Services.

The new standard contains a single model that applies to contracts with customers and two approaches for recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of individual transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. IFRS 15 also provides guidance relating to the treatment of contract acquisition and contract fulfillment costs. The Corporation will adopt IFRS 15 in its financial statements for the annual period beginning January 1, 2018.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

2. Significant accounting policies - continued

Significant accounting judgments, estimates and assumptions - continued

The Corporation meets the definition of an investment entity, and therefore, investments in subsidiaries are accounted for at FVTPL, rather than consolidating them. Investment income is out of the scope of IFRS 15, and therefore, the Corporation expects that the application of this new standard will have no overall impact, including on contractual fees as noted above, on the Corporation's financial statements.

On January 13, 2016, the IASB issued IFRS 16, Leases, which will replace IAS 17, Leases. IFRS 16 sets out the principles for the recognition, measurement and disclosure of leases. IFRS 16 provides revised guidance on identifying a lease and for separating lease and non-lease components of a contract. IFRS 16 introduces a single accounting model for all lessees and requires a lessee to recognize right-of-use assets and lease liabilities for leases with terms of more than 12 months, unless the underlying asset is of low value. Under IFRS 16, lessor accounting for operating and finance leases will remain substantially unchanged. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with earlier application permitted for entities that apply IFRS 15.

The Corporation intends to adopt IFRS 16 in its financial statements for the annual period beginning January 1, 2018, together with its adoption of IFRS 15. The adoption of IFRS 16 is not expected to have a material impact on the Corporation's financial statements as the Corporation has no significant operating lease arrangements.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that are expected to have a material impact on the Corporation.

3. Equity investments

As at December 31, 2017 and 2016, the Corporation's investments consist of equity interests in companies in the following segments:

	December 31, 2017				December	r 31, 2016		
	Cost	Cost FMV			Cost		FMV	
Publicly listed companies	\$ 22,413	\$	9,941	\$	25,225	\$	9,170	
Private companies	11,662		2,304		11,688		2,344	
	\$ 34,075	\$	12,245	\$	36,913	\$	11,514	

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

3. Equity investments - continued

As at December 31, 2017 and 2016, the Corporation's investments consist of equity interests in companies in the following industries:

	December 31, 2017				December	r 31, 2016		
	Cost		FMV	Cost			FMV	
Base and Precious Metals	\$ 13,984	\$	4,527	\$	17,117	\$	6,035	
Coal	1,981		-		1,981		-	
Diamonds	1,681		1,438		1,353		1,114	
Oil & Gas	12,778		2,841		12,917		1,920	
Other	3,505		3,437		3,397		2,441	
Uranium	146		2		148		4	
	\$ 34,075	\$	12,245	\$	36,913	\$	11,514	

The equity investments consist of investment in common shares of corporations of which 61.68% (December 31, 2016 - 67.33%) are listed on the TSX-V, 18.81% (December 31, 2016 - 20.36%) are private, 11.75% (December 31, 2016 - 9.67%) are listed on the TSX and 7.76% (December 31, 2016 - 2.64%) are listed on the Canadian Securities Exchange ("CSE") as of December 31, 2017.

An analysis of fair value was prepared for the private investments held in the portfolio. The analysis used comparable entities public corporation stock prices, observable index comparisons, transaction prices for same or similar instruments and information from brokers and other analysis. Based on this review, management has recorded a \$180 unrealized gain (2016 - \$1,216 unrealized gain) on certain private corporation investments.

4. Loans, advances, accounts receivable and prepaid expenses

Accounts receivable and prepaid expenses

	Decer 2	December 31, 2016		
Trade accounts receivable	\$	16	\$ 117	
Other receivable		3	3	
Prepaid expenses		4	4	
	\$	23	\$ 124	

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

4. Loans, advances, accounts receivable and prepaid expenses - continued

The aging of accounts receivables at the reporting date was:

	December 31, 2017		
Not past due	\$ 4	\$	4
Past due 0 - 30 days	-		8
Past due 31+ days	12		105
	\$ 16	\$	117

During the year ended December 31, 2017, the Corporation recognized an impairment loss of \$nil (2016 – impairment loss of \$184) in respect of trade accounts receivable.

Loans and advances receivable

	Dec	eember 31, 2017	December 31 2016		
<u>Current</u> Unrelated corporations	\$	175	\$	167	
Related corporation (Note 7)	·	748		807	
	\$	923	\$	974	

Certain of the loans to unrelated corporations bear interest at 10% and are due on demand. The loans to related corporations are non-interest bearing, and are due on demand.

5. Convertible debentures receivable

On August 31, 2016 the Corporation and Omineca Mining and Metals Ltd. ("OMM") restructured the terms of the debentures originally issued on November 30, 2010 and restructured on October 1, 2013. Pursuant to the terms of the restructure, the conversion feature was amended, below, and the maturity date was extended to October 1, 2021. The face value remains unchanged at \$5,400 and the debenture still bears interest at 8% per annum and is secured by current and future property rights, is payable upon maturity at October 1, 2021 and may be converted into common shares of OMM at any time at a revised conversion price as follows:

- \$0.20 prior to October 1, 2017
- \$0.50 on or after October 1, 2017, but prior to October 1, 2018
- \$0.75 on or after October 1, 2018

The restructuring resulted in a loss on modification of \$30. The fair value of the conversion feature of \$1,863 was re-estimated as of the date of the restructuring using the Black-Scholes option pricing model with the following assumptions: a share price of \$0.07, an exercise price of \$0.20, annualized volatility of 233.83%, an expected life of 5.09 years, a dividend rate of nil, and a risk-free interest rate of 0.82%, the carrying value was determined by first allocating the fair value of the embedded derivative asset and the residual to the carrying value of the convertible debenture receivable.

Notes to the Financial Statements

TMM Portfolio Management Inc. ("TMM") is responsible for the management of the Corporation's investment portfolio in accordance with the terms of a portfolio management agreement made January 1, 2008 (the "Management Agreement") and is to be reimbursed by the Corporation for all expenses reasonably and properly incurred in conducting the Corporation's business and in performing its duties and obligations under the Management Agreement. Additionally, pursuant to the Management Agreement, TMM: (a) is entitled to a quarterly management fee equal to 0.5% of the net asset value of the Corporation calculated as of the last business day of the relevant fiscal quarter; and (b) starting with the Corporation's fiscal year ended December 31, 2008, an annual performance bonus, calculated as of the last business day of the applicable fiscal year, in an amount in respect of each common share that is outstanding as of such day, equal to 20% of the amount, if any, by which the sum of the net asset value per common share as of that date, plus all dividends per common share during that fiscal year, exceeds the greater of \$16.34 and the net asset value per common share as of the last business day of the preceding fiscal year. Effective April 1, 2013, TMM agreed to temporarily fix the management fee at \$10 per month until February 1, 2014, post February 1, 2014 the management fee was \$17 per month, on November 1, 2014 the fixed fee was increased to \$20 per month plus GST and will remain at this level until such time as management and the board of directors deem it appropriate to return to the original compensation plan as documented in the Management Agreement. Effective January 1, 2017, the temporary fixed management fee was ceased and the normal management fee arrangement was resumed.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

7. Corporation Information and Related party transactions - continued

Compensation of key executive personnel - continued

Effective June 1, 2015, the Company and Jaelky Holdings Inc. ("Jaelky") entered into a consulting agreement. Mr. Andrew Davidson, the Chief Financial Officer of the Company, was and continues to be the sole director and sole voting shareholder of Jaelky. Jaelky is entitled to be paid a consulting fee of \$20 (2016 - \$16) plus GST on a monthly basis.

Related party balances

As at December 31, 2017, \$724 is receivable (December 31, 2016 – \$807 receivable) from Westcore Energy Ltd., which has been included in loans and advances receivable. The balance is not interest bearing and due on demand.

As at December 31, 2017, \$24 is receivable (December 31, 2016 – \$nil receivable) from OMM, which has been included in loans and advances receivable. The balance is not interest bearing and due on demand.

As at December 31, 2017, \$77 is payable (December 31, 2016 – \$21 payable) to TMM, which has been included in accounts payable and accrued liabilities.

As of December 31, 2017, \$54 is payable (December 31, 2016 - \$17) to Jaelky, which has been included in accounts payable and accrued liabilities.

As at December 31, 2017, it was determined that the related party receivable from Allstar was unlikely to be collected in the future as a result of Allstar disposing of all of its assets in 2016. As such, the Corporation wrote the related party receivable to \$nil and recorded an impairment of \$18 during the year ended December 31, 2017 (2016 - \$2,981).

As at December 31, 2016, it was determined that the related party loan receivable from CVG Mining Ltd ("CVG"), a wholly owned subsidiary of OMM, was unlikely to be collected in the future. As such the Corporation wrote the related party loan receivable to \$nil and recorded an impairment provision of \$98.

8. Convertible debentures

a) On May 26, 2015 the Corporation received debenture holder approval to restructure the terms of the debentures originally issued on June 29, 2011 and July 11, 2011 and restructured on June 6, 2013 (the "original debentures"). Pursuant to the terms of the restructure, the Corporation extinguished the original debentures and issued 18,622,722 common shares, a new \$3,104 senior secured convertible debenture (the "revised debentures") and 3,103,795 preferred shares (Series I), with a cumulative annual dividend rate of 2.5%. The preferred shares are redeemable by the Corporation after the third anniversary of the issuance date.

The revised debentures have a 5 year term, maturing June 29, 2020, bear interest from the date of issuance at 2.5% per annum (previously 9%) which, unless the debentures are earlier converted or redeemed in accordance with their terms, interest will be paid on June 29 in each of 2016, 2017, 2018, 2019 and on maturity.

The revised debentures are convertible, at the option of the respective holders, at any time or from time to time prior to 5:00 p.m. (Toronto time) on June 29, 2020, into fully paid, non-assessable common shares of the Corporation at a conversion price of \$0.50 per common share.

Subject to certain conditions precedent, the Corporation may redeem the revised debentures prior to maturity at a redemption price equal to their principal amount plus interest accruing to but otherwise unpaid to the date preceding the redemption date.

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

8. Convertible debentures - continued

The restructuring was accounted for as an extinguishment for accounting purposes, which resulted in a gain on extinguishment of \$9,390. The original debentures were derecognized and the revised debentures, preferred shares and common shares were measured at their fair values on the date of the restructuring with an effective interest rate of 12%. The fair value of the revised debentures of \$2,041 was estimated using discounted future cash flows, and the difference between the fair value and the principal amount was allocated to the conversion feature in the amount of \$1,063. In addition, the \$647 fair value of the preferred share cumulative dividend was estimated using discounted future cash flows and was allocated to the debt component of the preferred shares. The residual value of the revised debentures and preferred shares were allocated to equity, and the common shares were valued using the market price at the date of the restructuring. The carrying value of the liability component of the revised debentures as at December 31, 2017 was \$2,302 (December 31, 2016 - \$2,188).

b) On December 18, 2015 the Corporation received debenture holder approval to restructure the terms of the debentures originally issued on September 23, 2010 and October 13, 2010 and restructured on June 6, 2013 (the "original debentures"). Pursuant to the terms of the restructure, the Corporation extinguished the original debentures and issued 4,605,979 common shares, a new \$1,896 senior secured convertible debenture (the "revised debentures"), \$880 in subordinated debentures (Note 7) and 767,663 preferred shares (Series II), with a cumulative annual dividend rate of 2.5%. The preferred shares are redeemable by the Corporation after the third anniversary of the issuance date.

The revised debentures have a 5 year term, maturing December 18, 2020, bear interest from the date of issuance at 2.5% per annum (previously 9%) which, unless the debentures are earlier converted or redeemed in accordance with their terms, interest will be paid on December 18 in each of 2016, 2017, 2018, 2019 and on maturity.

The revised debentures are convertible, at the option of the respective holders, at any time or from time to time prior to 5:00 p.m. (Toronto time) on December 18, 2020, into fully paid, non-assessable common shares of the Corporation at a conversion price of \$0.50 per common share.

Subject to certain conditions precedent, the Corporation may redeem the revised debentures prior to maturity at a redemption price equal to their principal amount plus interest accruing to but otherwise unpaid to the date preceding the redemption date.

The restructuring was accounted for as an extinguishment for accounting purposes, which resulted in a gain on extinguishment of \$3,411. The original debentures were derecognized and the revised debentures, subordinate debentures, preferred shares and common shares were measured at their fair value on the date of the restructuring with an effective interest rate of 12%. The fair value of the revised debentures of \$1,248 was estimated using discounted future cash flows, and the difference between the fair value and the principal amount was allocated to the conversion feature in the amount of \$650. In addition, the \$160 fair value of the preferred share cumulative dividend was estimated using discounted future cash flows and was allocated to the debt component of the preferred shares. The residual value of the revised debentures and preferred shares were allocated to equity, and the common shares were valued using the market price at the date of the restructuring. The carrying value of the liability component of the revised debentures as at December 31, 2017 was \$1,408 (December 31, 2016 - \$1,310).

Notes to the Financial Statements

Accretion		-		314		
Balance, December 31, 2017	\$	4,622	\$	3,710	\$	1,583

9. Subordinate debentures

On December 18, 2015 as part of the debenture restructure as described in Note 8(b), \$881 in subordinated debentures were issued.

The subordinated debentures have a 5 year term, maturing December 18, 2020, bear interest from the date of issuance at 2.5% per annum which, unless the debentures are earlier converted or redeemed in accordance with their terms, interest will be paid on December 18 in each of 2016, 2017, 2018, 2019 and on maturity.

The debentures are convertible, at the option of the respective holders, at any time or from time to time prior to 5:00 p.m. (Toronto time) on December 18, 2020, into fully paid, non-assessable common shares of the Corporation at a conversion price of \$0.50 per common share.

	Liability Component				Equity Component		
	Face	Value	Carrying	g Value	Carrying Value		
Balance, January 1, 2016 Accretion	\$	880	\$	581 47	\$	301	
Balance at December 31, 2016		880		628		301	
Accretion		-		52		-	
Balance, December 31, 2017	\$	880	\$	680	\$	301	

Subject to certain conditions precedent, the Corporation may redeem the revised debentures prior to maturity at a redemption price equal to their principal amount plus interest accruing to but otherwise unpaid to the date preceding the redemption date.

The fair value of the subordinate debentures of \$579 was estimated using discounted future cash flows, and the difference between the fair value and the principal amount was allocated to the conversion feature in the amount of \$301. The carrying value of the liability component of the subordinate debentures as at December 31, 2016 was \$680 (December 31, 2016 - \$628).

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

10. Deferred income taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Corporation's deferred tax assets and liabilities are as follows:

	Dec	December 31		ember 31
		2017		2016
Non-capital and capital loss carryforwards	\$	3,223	\$	3,633
Share issue costs		8		13
Exploration and evaluation assets		221		482
Convertible debentures		265		57
Property, plant and equipment		2		4
Equity investments		1,239		1,719
Unrecognized deferred tax as sets		(4,958)		(5,908)
Deferred income tax	\$	-	\$	-

The provision for income tax, both current and deferred, differs from the amount calculated by applying the combined expected federal and provincial rate to profit before taxes. The reasons for these differences are as follows:

	Dec	December 31 2017		
Income (loss) for the year before income taxes	\$	(467)	\$	7,418
Expected income tax expense (recovery)		(126)		2,003
Non-deductible expenditures		616		(518)
Accreted discount on debt		-		36
Impact of deconsolidation		-		(997)
Non-taxable portion of unrealized losses		(477)		(820)
Other		935		898
Change in unrecognized deferred income tax		(948)		(602)
	\$	-	\$	-

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

10. Deferred income taxes - continued

As of December 31, 2017, the Corporation has approximately the following tax pools available as a deduction from future income at the prescribed tax rates. These tax pools are subject to confirmation by income tax authorities:

	December 31		De	cember 31
		2017		2016
Non-capital losses carried forward	\$	9,638	\$	11,481
Capital losses carried forward		2,300		1,976
Property plant and equipment		7		11
Convertible debentures and preferred shares		980		968
Share issue costs		30		49
Investments		9,180		12,735
Cumulative Canadian exploration and				
development expenses		819		1,027
	\$	22,954	\$	28,247

As of December 31, 2017, the Corporation has non-capital losses of \$9,638 (December 31, 2016 - \$11,481) available to carry forward to reduce future years' taxable income with expiration ranging from 2033 to 2036.

Tax attributes are subject to review, and potential adjustment, by tax authorities.

11. Common shares, preferred shares and contributed surplus

Authorized:

An unlimited number of voting common shares without par value, an unlimited number of non-voting first preferred shares (Series I) with a redemption value of \$1, and an unlimited number of non-voting first preferred shares (Series II) with a redemption value of \$1. All shares are fully paid.

Issued and outstanding

On June 15, 2016, the Corporation completed a non-brokered private placement of 6,000,000 units at a price of \$0.10 per unit, for gross proceeds of \$600,000. Each unit subscription entitled the holder to one common share of the Corporation and one common share purchase warrant. Each whole warrant entitles the holder thereof to purchase one additional common share of the Corporation at an exercise price of \$0.15 per warrant share for a period of 24 months.

On August 17, 2016, the Corporation completed a non-brokered private placement of 4,000,000 units at a price of \$0.10 per unit, for gross proceeds of \$400,000. Each unit subscription entitles the holder to one common share of the Corporation and one additional common share purchase warrant. Each whole warrant entitles the holder thereof to purchase one common share of the Corporation at an exercise price of \$0.15 per warrant share for a period of 22 months. In connection with the financing the Corporation incurred share issue costs of \$28.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

11. Common shares, preferred shares and contributed surplus - continued

	Common s	Common shares Pro		
	Quantity	Amount	Quantity	Amount

Balance at December 31, 2017	60,189,884	\$ 70,313	3,440,052 \$	2,723

The first preferred shares are convertible at the option of the holder into common shares at a conversion price of \$0.50 per common share and were valued at issuance at \$1.00 per preferred share. The preferred shares bear a cash dividend at the rate of 2.5% payable annually in arrears.

Stock option plan

The directors of the Corporation have adopted, and the shareholders have approved a stock option plan (the "2008 Option Plan"), pursuant to which the directors may from time to time grant options for up to 10% of its issued and outstanding shares, all options vest immediately upon issuance. The purpose of the 2008 Option Plan is to attract, retain and motivate directors, employees and consultants of the Corporation and its subsidiaries and to advance the interests of the Corporation by providing such persons with the opportunity, through stock options, to acquire an equity interest in the Corporation.

A summary of the status of the 2008 stock option plan and changes to outstanding and exercisable stock options during the year is presented below:

	December	December 31, 2017		
	Options	Price	Options	Price
Beginning of year	5,090,000 \$	0.17	3,100,000 \$	0.24
Options forfeited	-	-	(150,000)	0.30
Options forfeited	-	-	(110,000)	0.50
Options exercised	(750,000)	0.07	-	-
Options granted	900,000	0.07	2,250,000	0.10
End of year	5,240,000 \$	0.16	5,090,000 \$	0.17

As at December 31, 2017, the weighted average remaining life of stock options is 7.62 years (December 31, 2016 - 8.26 years).

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

11. Common shares, preferred shares and contributed surplus - continued

Stock option plan - continued

On August 26, 2016, the board of directors of the Corporation approved the grant of 2,250,000 stock options pursuant to the 2008 Option Plan. 1,500,000 of the options were granted to directors and executive officers with the balance granted to employees and consultants. The options are exercisable at \$0.10 per share, vest immediately and, if not exercised, expire August 26, 2026, subject to earlier expiration in accordance with the 2008 Option Plan and applicable policies of the TSX-V.

The value of options issued on August 26, 2016, using the Black-Scholes option pricing model, was \$207 (\$0.09 per option) which was allocated to the share-based compensation expense with a corresponding increase in contributed surplus. Assumptions used in the pricing model for the year are as follows: risk-free interest rate of 0.82%, expected life of 10 years, annualized volatility 110.20% and dividend rate of nil.

On November 24, 2017, the board of directors of the Corporation approved the grant of 900,000 stock options pursuant to the 2008 Option Plan. 600,000 of the options were granted to directors and executive officers with the balance granted to employees and consultants. The options are exercisable at \$0.07 per share, vest immediately and, if not exercised, expire November 24, 2027, subject to earlier expiration in accordance with the 2008 Option Plan and applicable policies of the TSX-V.

The value of options issued on November 24, 2017, using the Black-Scholes option pricing model, was \$54 (\$0.06 per option) which was allocated to the share-based compensation expense with a corresponding increase in contributed surplus. Assumptions used in the pricing model for the year are as follows: risk-free interest rate of 1.77%, expected life of 10 years, annualized volatility 113.12% and dividend rate of nil.

Warrants

A summary of the outstanding and exercisable warrants during the year is presented below:

	December 3	December 31, 2017		
	Warrants	Price	Warrants	Price
Beginning of year	13,538,769 \$	0.19	3,538,769 \$	0.30
Warrants expired	(3,538,769)	0.30	- \$	-
Warrants issued	-	-	10,000,000	0.15
End of year	10,000,000 \$	0.15	13,538,769 \$	0.19

As at December 31, 2017, the weighted average remaining life of warrants is 0.45 years (December 31, 2016 – 1.29 years).

(in thousands of Canadian dollars, except securities and per share amounts)

For the years ended December 31, 2017 and 2016

11. Common shares, preferred shares and contributed surplus - continued

Warrants - continued

On June 15, 2016, the Corporation issued 6,000,000 share purchase warrants as part of a financing completed. Each warrant entitles the holder to purchase one common share of the Corporation at a price of \$0.15 for a period of 24 months and vested immediately. In accordance with the Corporation's accounting policy in regards to unit bifurcation, the Corporation calculated the relative fair value of these warrants at \$269. Assumptions used in the Black-Scholes option pricing model were as follows: dividend yield 0%, expected volatility of 148.67%, and a risk free interest rate of 0.49%. These warrants expire on June 15, 2018.

On August 17, 2016, the Corporation issued 4,000,000 share purchase warrants as part of a financing completed. Each warrant entitles the holder to purchase one common share of the Corporation at a price of \$0.15 for a period of 22 months and vested immediately. In accordance with the Corporation's accounting policy in regards to unit bifurcation, the Corporation calculated the relative fair value of these warrants at \$144. Assumptions used in the Black-Scholes option pricing model were as follows: dividend yield 0%, expected volatility of 154.08%, and a risk free interest rate of 0.56%. These warrants expire on June 15, 2018.

Contributed surplus

A summary of the contributed surplus activity is as follows:

	Dece	December 31,		ember 31,
		2017		2016
Balance, beginning of year	\$	5,324	\$	4,704
Fair value of stock options granted		54		207
Warrants issued		-		413
Stock options exercised		(41)		-
Balance, end of year	\$	5,337	\$	5,324

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

11. Common shares, preferred shares and contributed surplus - continued

EPS and diluted EPS

Basic EPS is calculated by dividing the net income (loss) for the year by the weighted average number of common shares outstanding during the year.

Diluted EPS is determined by dividing the profit or loss attributable to common shareholders by the weighted average number of common shares outstanding, adjusted for the effects of all potential dilutive common shares related to stock options, warrants, convertible and subordinate debentures and convertible preferred shares issued by the Corporation.

			2016		
Net income (loss) attributable to common shareholders	\$	(467)	\$	7,418	
Weighted average number of common shares - basic	5	9,078,872	52,823,827		
Weighted average number of common shares - diluted	5	9,078,872	71,735,647		
Basic earmings (loss) per common share - basic	\$	(0.01)	\$	0.14	
Basic earnings (loss) per common share - diluted	\$	(0.01)	\$	0.11	

The Corporation's stock options, convertible and subordinate debentures and preferred shares had a dilutive effect during the year ended December 31, 2016. All stock options, convertible debentures and preferred shares were excluded from the diluted weighted average number of shares calculation for the year ended December 31, 2017, as their effect would have been anti-dilutive.

Shareholder rights plan

The directors of the Corporation have approved a shareholder rights plan ("Rights Plan"). In the event a bid to acquire control of the Corporation is made, the Rights Plan is designed to give the directors of the Corporation time to consider alternatives to allow shareholders to receive full and fair value for their shares. In the event that a bid, other than a permitted bid, is made, shareholders become entitled to exercise rights to acquire common shares of the Corporation at a significant discount to the market price.

12. Capital management

The Corporation defines capital as shareholders' equity.

The Corporation's objectives when managing capital are:

- (a) to allow the Corporation to respond to changes in economic and/or marketplace conditions by maintaining the Corporation's ability to purchase new investments;
- (b) to provide sustained growth and value by increasing equity; and,
- (c) to maintain a flexible capital structure which optimizes the cost of capital at acceptable levels of risk.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

12. Capital management - continued

The Corporation manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying assets. The Corporation maintains or adjusts its capital level to enable it to meet its objectives by:

- (a) realizing proceeds from the disposition of its investments;
- (b) utilizing leverage in the form of margin (due from brokers);
- (c) raising capital through equity financings;
- (d) borrowing funds in the form of advances from related parties; and,

The Corporation is not subject to any capital requirements imposed by a regulator. There were no changes in the Corporation's approach to capital management during the year. The Corporation's management is responsible for the management of capital and monitors the Corporation's use of various forms of leverage on a daily basis.

13. Financial instruments and risk management

The investment operations of the Corporation's business involve the purchase and sale of securities and, accordingly, a significant portion of the Corporation's assets are currently comprised of financial instruments. The use of financial instruments can expose the Corporation to several risks, including market, credit, interest rate, commodity price and liquidity risks. A discussion of the Corporation's use of financial instruments and their associated risks is provided below.

(a) Liquidity risk:

Liquidity risk is the risk that the Corporation will have insufficient cash resources to meet its financial obligations as they come due. The Corporation's liquidity and operating results may be adversely affected if the Corporation's access to the capital markets is hindered, whether as a result of a downturn in stock market conditions, generally or related to matters specific to the Corporation, or if the value of the Corporation's investments decline, resulting in losses upon disposition.

The Corporation generates cash flow primarily from its financing activities and proceeds from the disposition of its investments, in addition to interest and dividend income earned on its investments.

The Corporation may use financial leverage (or "margin") when purchasing investments. Trading on margin allows the Corporation to borrow part of the purchase price of the investments (using marginable investments as collateral), rather than pay for them in full. Buying on margin allows the Corporation to increase its portfolio size by increasing the number and amount of investments through leverage. However, if the market moves against the Corporation's positions and the Corporation's investments decline in value, the Corporation may be required to provide additional funds to its brokers.

Given the nature of the Corporation's business, the Corporation may not have sufficient cash on hand to meet margin calls and may be required to liquidate investments prematurely and/or at a loss, in order to generate funds needed to satisfy the Corporation's obligations.

The Corporation has at times borrowed funds from other sources to meet its obligations, but there can be no assurances that such funds will be available in the future, or available on reasonable terms, and the absence of available funding and/or the sale of the Corporation's investments in order to meet margin calls could have a materially adverse impact on the Corporation's operating results. The Corporation manages liquidity risk by reviewing the amount of margin available and managing its cash flow. The Corporation holds investments which can be readily converted into cash when required.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

13. Financial instruments and risk management - continued

(b) Market risk:

Market risk is the risk that the fair value of, or future cash flows from, the Corporation's financial instruments will significantly fluctuate because of changes in market prices. The value of the financial instruments can be affected by changes in interest rates, equity and commodity prices. The Corporation is exposed to market risk in trading its investments and unfavorable market conditions could result in dispositions of investments at less than favorable prices.

The Corporation manages market risk by having a portfolio which is not singularly exposed to any one issuer or class of issuers. The Corporation's investment activities are currently concentrated primarily across several sectors in the natural resource industry, including potash, oil and gas, coal, precious metals, base metals, uranium, diamonds and other commodities.

(c) Interest rate risk:

Interest rate risk is the impact that changes in interest rates could have on the Corporation's earnings and liabilities. As at December 31, 2017 and 2016, the Corporation had no liabilities payable that bear interest at rates fluctuating with the prime rate.

(d) Credit risk:

Credit risk is the risk associated with the inability of a third party to fulfill its payment obligations. The Corporation is exposed to the risk that third parties that owe it money or securities (in connection with its loans receivable, for example) will not perform their underlying obligations.

The Corporation's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Corporation's customer base, including the default risk of the industry in which the customers operate, as these factors may have an influence on credit risk, particularly in the current economic circumstances.

At December 31, 2017 the Corporation had loans and advances receivable and accounts receivable and prepaid expenses from companies, totaling \$946 (December 31, 2016 - \$1,098) which represents approximately 4.8% (December 31, 2016 - 5.6%) of the Corporation's total assets. During the year ended December 31, 2017 an impairment loss of \$8 (2016 - \$282) and an allowance for doubtful accounts provision of \$18 (2016 - \$3,283) was recorded.

(e) Commodity price risk:

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are impacted not only by the relationship between the Canadian and United States dollar, but also by world economic events that dictate the levels of supply and demand.

In the past, and from time to time, the Corporation has attempted to mitigate a portion of its commodity price risk through the use of the futures contract, as at December 31, 2017 and 2016 – all futures contracts have been disposed.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

13. Financial instruments and risk management - continued

(f) Fair value:

The fair value of the Corporation's financial assets and liabilities approximate their carrying values unless otherwise disclosed in the accounting policies.

Fair value hierarchy and determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- In the absence of a principal market, in the most advantageous market for the asset or liability

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Corporation and its subsidiaries uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

The fair value of the financial instruments is included at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described, as follows, based on the lowest-level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest-level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest-level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis at fair value, the Corporation determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest-level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Corporation assets that are recognized at fair value on a recurring basis are the equity investments.

13. Financial instruments and risk management - continued

(f) Fair value: - continued

The following is a summary of the fair value of investments segregated based on the various levels of inputs, as discussed in Note 2:

	<u>I</u>	evel 1]	Level 2	Level 3	<u>Total</u>
Equity investments, at fair value Embedded derivative asset	\$	9,438	\$	503	\$ 2,304 302	\$ 12,245 302
	\$	9,438	\$	503	\$ 2,606	\$ 12,547

For the year ended December 31, 2017, a reconciliation of investments measured at fair value using unobservable inputs (Level 3) is presented as follows:

Beginning balance as at December 31, 2016	\$ 3,937
Reclassification to Level 1	(120)
Fair value adjustments	 (1,211)
Balance at December 31, 2017	\$ 2,606

Within Level 3, the Corporation includes private company investments. The key assumptions driving the valuation of these instruments include, but are not limited to, the value at which a recent financing was completed by the investee, significant changes in general market conditions and company specific information. For those investments valued based on general market condition and company specific information, these inputs can be highly judgmental. A \pm 0 change in the fair value of these investments will result in a corresponding \pm 0 change to the total fair value of the investments. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different circumstances.

The sensitivity analysis is intended to reflect the uncertainty inherent in the valuation of these investments under current market conditions and its results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the fair value of these investments. Furthermore, the analysis does not indicate a probability of such changes occurring and it does not necessarily represent the Corporation's view of expected future changes in the fair value of these investments. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.

Notes to the Financial Statements

(in thousands of Canadian dollars, except securities and per share amounts) For the years ended December 31, 2017 and 2016

14. Supplemental cash flow information

The following table summarizes the net changes in non-cash working capital items related to operating activities:

	2017		2016	
Loans and advances receivable	\$ (81)	\$	(4)	
Accounts receivable and prepaid expenses	93		(38)	
Accounts payable and accrued liabilities	79		(1,448)	
	\$ 91	\$	(1,490)	

Non-cash transactions:		017	2016	
Loans and advances receivable issued in disposal of equity investments	\$	131	\$ -	
Loans and advances receivable settled through receipt of equity investments	\$	-	\$ 1,049	
Share proceeds for property, plant and equipment	\$	-	\$ 75	
Convertible debentures converted to common shares	\$	155	\$ 235	
Preferred shares converted to common shares	\$	194	\$ 237	
Interest paid in the year	\$	126	\$ 102	
Income taxes paid in the year	\$	_	\$ _	

15. Comparatives

Certain of the comparative figures have been reclassified to conform with the current year's presentation.
